SUMMARY

Bachelor's degree student in Computer Science with strong foundation in data structures, algorithms, and object-oriented programming. Looking forward to a Software Engineering Internship role. I have experience of building React, JavaScript-based, scalable web applications that interact with REST APIs, and also exposure to backend development. Possess strong problem-solving skills, great attention to detail, and a proven collaborative ability on real-world projects. Willing to contribute to large-scale systems and to learn cloud computing and scalable systems among other modern technologies.

EDUCATION

IIIT Vadodara — B.Tech in Computer Science and Engineering; **CPI: 8.57/10** 2023 – Present
Avadh Collegiate, CBSE — Senior Secondary (PCM); **95.2%** 2021 – 2022
Avadh Collegiate, CBSE — High School; **95.2%** 2019 – 2020

SKILLS

Domains: Software Engineering, Machine Learning, Web Development, App Development

Languages: C/C++, Java, JavaScript, Python

Frameworks & Libraries: React.js, jQuery, Next.js, Flutter, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB

Web: HTML, CSS, JavaScript, REST APIs, Web Services, Node.js (Basics)

Tools: Git, GitHub, Vite, Figma, Linux (Ubuntu)

Problem Solving: LeetCode (1500+ rating, 10+ contests)

RELEVANT COURSEWORK

• Operating Systems • Object Oriented Programming • DBMS • Software Engineering • Data Structure and Algorithms

EXPERIENCE

Research Intern (Machine Learning) | IIIT Vadodara May 2026 – July 2026

- Conducted research on healthcare datasets to develop machine learning models for predictive analytics and classification tasks using Python.
- Performed data preprocessing, exploratory data analysis, feature engineering, and model evaluation using Pandas, NumPy, and Scikit-learn.
- Implemented, trained, and compared supervised learning, ensemble learning, and neural network models with hyperparameter tuning and cross-validation.
- Contributed to an ongoing research project with work intended for publication as an **AAAI 2027 conference paper** and an **Elsevier book chapter**.

CERTIFICATIONS

IDEATHON CEREBRO 2024-25 | [CERT](#) Flipkart Runway Season 5 | [CERT](#) TCS iON Career Edge | [CERT](#) Adobe Hackathon 2025 | [CERT](#) SimpliLearn Python Course | [CERT](#) NVIDIA Deep Learning | [CERT](#)

PROJECTS

AI Flashcard Generator | [LIVE DEMO](#) | [GitHub](#)

- Designed an AI-powered web app that generates flashcards and quizzes from user input using the Gemini API
- Built responsive UI using React 18 and jQuery, including interactive features like card flip animations and progress tracking
- Implemented localStorage with custom React hooks for persistent data and modular component-based architecture

Tech Stack: React, jQuery, JavaScript, HTML, CSS, Tailwind CSS, Gemini API, Vite, Vercel

Campus Nexus | [LIVE DEMO](#) | [GitHub](#)

- Collaborated in a team of 4 to design a centralized platform for managing college schedules (mess, transport, exams, timetable) for verified students
- Built and integrated backend APIs using Flask with MongoDB for efficient data storage and retrieval
- Programmed an interactive frontend using Streamlit to display real-time schedule information
- Implemented email notifications using SMTP and managed secure configuration using environment variables

Tech Stack: Python, Flask, MongoDB, Streamlit, SMTP

Movie Recommender System | [LIVE DEMO](#) | [GitHub](#)

- Recommends top 5 movies from 5000+ titles using cosine similarity on metadata
- Integrated TMDB REST API to fetch and display real-time movie posters for each recommendation.
- Built Streamlit UI with dropdown search and 5-column poster layout
- Deployed on Streamlit Cloud with secure API key management

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Streamlit, TMDB API, Streamlit Cloud
